# Mast Cam-I

- Forklift drivers **don't have to operate blind** when moving pallets in deep and tall racking anymore
- **Product damage and safety incidents decrease** when operators can see their forks from an ideal perspective at all times
- Camera use **increases the efficiency of less-experienced forklift operators**
- **Fast installation** – complete in 30 minutes to 1 hour. All parts bolt-on with no welding or drilling required. No mast cable installation is required since camera is wireless
- Models are available with the camera powered from a battery pack or from the forklift power supply. The run-time of the camera battery is estimated **at 100 service hours** between charges.  
\* **Freezer-rated models are available.**
- State-of-the-art image sharpness - 720p screen resolution – *image even allows scanning of label bar codes in some cases*

**KIT INCLUDES:** Camera, Monitor, Monitor Mount, Antennas for Monitor and Camera, Monitor Wire Harness, Owner's Manual/Installation Guide

**AVAILABLE OPTIONS:** 2 Camera Batteries, 1 Battery Charger, Battery Holder, automatic shutoff

## YOUR MONITOR VIEW:

Increase productivity

Eliminate operator pain

Decrease risk of safety incidents

Reduce product damage
