

Mast Cam-I

- Forklift drivers **don't have to operate blind** when moving pallets in deep and tall racking anymore.
- **Product damage and safety incidents decrease** when operators can see their forks from an ideal perspective at all times.
- Camera use **increases the efficiency of less-experienced forklift operators.**
- Models are available with the camera powered from a battery pack or from the forklift power supply. The runtime of the camera battery is **estimated at 18 continuous service hours** between charges.
- State-of-the-art image sharpness - 720p screen resolution – image even allows scanning of label barcodes in some cases

THE KIT INCLUDES: Camera, Monitor, Monitor Mount, Antennas, Monitor Wire Harness, Owner's Manual/Installation Guide. Systems can be supplied with Battery-Powered Cameras and would Include Batteries, Holder, and Charger.
